

# GOOD JOB!

## Going Trenchless Makes Sense.

- 1.** Trenchless Utility Construction complements today's traditional construction methods.
- 2.** Trenchless provides a competitive advantage for everyone from Owners and Engineers to Contractors and Sub-Contractors.
- 3.** Trenchless saves you money, by limiting traffic disruption and lowering restoration costs.
- 4.** Trenchless Utility Construction saves time.
- 5.** Trenchless provides education. Just search "Trenchless" or visit [www.northeasttrenchless.com](http://www.northeasttrenchless.com).
- 6.** Trenchless is Green Utility Construction – less emissions, better traffic flow, less excavation, limited disruption to protected areas, trenchless lowers your carbon footprint.
- 7.** Trenchless is a mature market, with over 50 years of new installation and rehabilitation methods in place.
- 8.** Trenchless protects your underground assets. Today's installation methods can help locate and map your current and new pipelines, conduits and cables.
- 9.** Trenchless is your solution to lower social costs.
- 10.** Trenchless serves your market. If you are involved in water, sewer, rail, road, gas, residential, geothermal, remediation, electric, alternative energy, geotechnical, marine, telephone, cable or any other pipeline new installation or rehabilitation methods, trenchless is for you.

This ad was developed through the Northeast Trenchless Association. The intention is to assist in the promotion of trenchless utility construction applications in today's green society. This ad may be picked up, free of charge for promotional use in presentations, marketing material, or for any other designated use pending approval of the Northeast Trenchless Association, at [www.northeasttrenchless.com](http://www.northeasttrenchless.com).
